

Optimizing Science & Exploration Working Group:

An opportunity to reinforce Moon-Mars linkages

- NASA HQ joint working group (ESMD/SMD/SOMD)
- Ongoing effort to infuse science objectives/requirements into the Exploration Architecture and Constellation Architecture requirements documents
 - Developing science scenarios for Lunar exploration
 - Deriving requirements to optimize science return
- Focus is on Lunar science--however, it is also an opportunity to reinforce the linkages between Mars science and future humans to Mars architectures and the evolving Lunar exploration architecture
- Work involves outreach/engagement/participation of broader science community (e.g., LEAG, NLSI, MEPAG, etc.)
- If interested, please provide your contact information to George Tahu (george.tahu@nasa.gov)
